Annual Report
PGH Badulla

Uva Province

Uva is Sri Lanka's second least populated province, with 1.3 million people, created in 1896. It consists of two districts: Badulla and Moneragala. The provincial capital is Badulla. Uva is bordered by Eastern, Southern and Central provinces.

Its major tourist attractions are Dunhinda falls, Diyaluma Falls, Rawana Falls, the Yala National Park (lying partly in the Southern and Eastern Provinces) and Gal Oya National Park (lying partly in the Eastern Province). The Gal Oya hills and the Central mountains are the main uplands, while the Mahaweli and Menik rivers and the huge Senanayake Samudraya and Maduru Oya Reservoirs are the major waterways.

Message from the Director

As one of the finest hospitals in the country, PGH Badulla has a proud heritage of serving the community over 120 years and we have been a driving force for health care in the region to the present day. We are united in our determination to continue our steady efforts so that we can provide highly-advanced health care that is safe, secure and caring, in a manner that lives up to the expectations of patients and the wider community.

With our annual report year 2012, we are happy to reflect the strength, success and progress of our services over the last five years and we have tried to describe our clinical and supportive services separately to elaborate their contribution in achieving our goals.

While we are proud of our achievements, we have recognized numerous personnel who have pushed us to ensure that our hospital maintains the highest standards of performance.

Firstly, I would like to extend my gratitude to Hon. Maithripala Sirisena, Minister of Health; Dr. Nihal Jayathilake, the Secretary of Ministry of Health; Dr. P.G. Mahipala, the Director General of Health Services; Dr. Ajith Mendis, Former Director General of Health Services; Dr. Wimal Jayantha, Deputy Director General (Planning) and other officials of the ministry of health for their enduring guidance, support and involvement enabling our hospital to be committed to expand and continue patient care services in order to uplift the quality of lives of the people of Uva.

I would also wish to acknowledge the commitment and endeavor shown by the hospital staff including all our consultants & stakeholders in improving high standards of healthcare and in positioning the institution to meet the future challenges and demands.

Dr K.M.D Dharmapriya.
Director,
Provincial General Hospital,
Badulla.

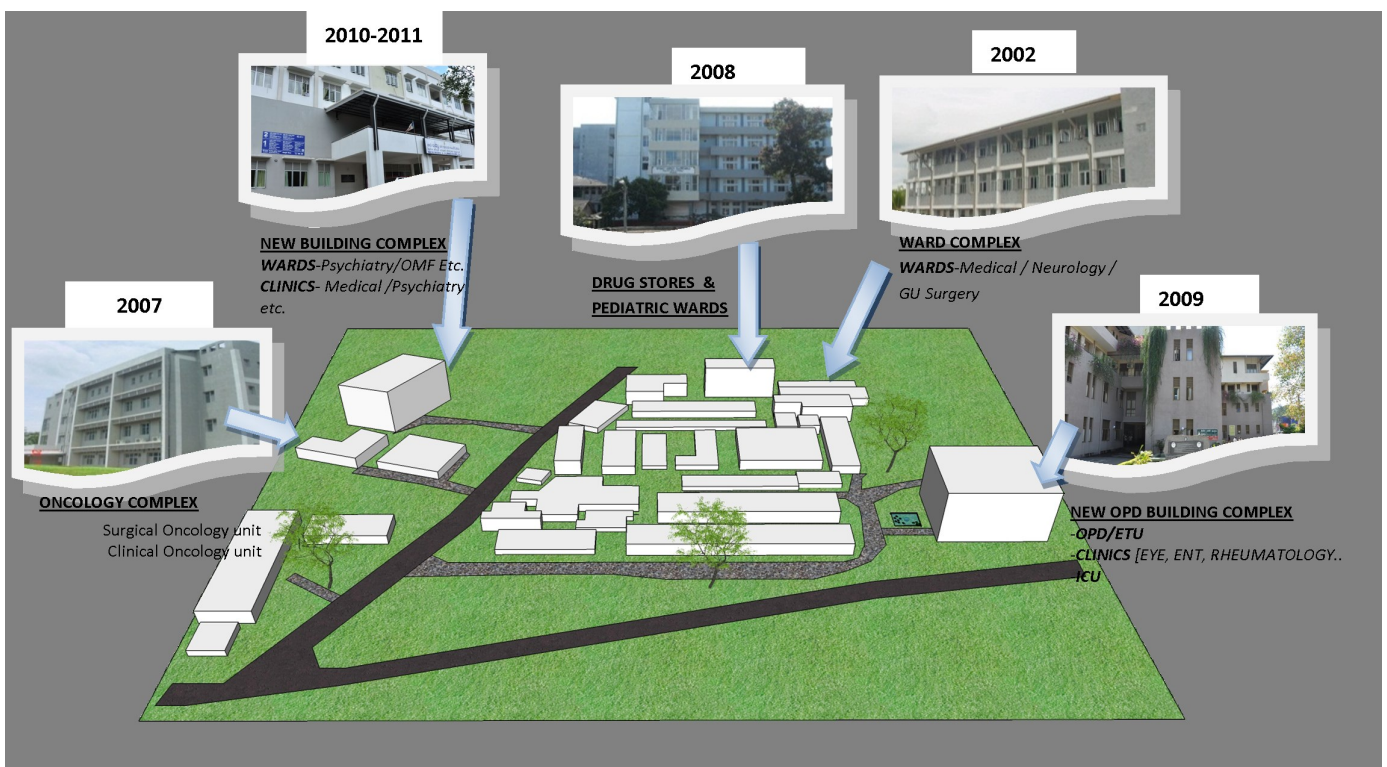

Provincial General Hospital- Badulla is a compassionate provider of patient-centered health services with an emphasis on tertiary-level specialty care, primarily for residents of Uva province. Our hospital provides a wide variety of specialized services across almost all health-care disciplines and collaborates with a wide range of partners to address the needs of the culturally diverse community and to build a strong, integrated system for regional health-care delivery.

In 2012 as the premier healthcare provider (1375 bedded) in the region, we continued to serve our patients with kindhearted healthcare of the highest quality and we had the opportunity to serve more than 750,000 patients including over 90000 in-patients with a dedicated staff of 1900 .

Our roots are deep

Our origin dates back to an old Colonial Hospital, which was established in 1891 and Provincial General Hospital - Badulla is one of the longest serving hospitals in the country. In year 2000 it was incorporated to the Line Ministry

Timeline

During last few years, Our hospital has received several awards in appreciation of our services and extraordinary commitment

- * **Provincial Productivity Quality Award in 2009** (organized by office of Provincial Director of Health Services- Uva)
- ***Suwa Muthu Harasara Award in 2010**, (organized by Uva Provincial Council-Ministry of Health indigenous medicine ,probaton and child care and woman affairs)
- ***National Health Excellence Award in 2010** - commendation certificate (organized by the Ministry of Health)
- ***National productivity award 2010/2011 inter departmental category (Grade C)**- (organized by the Ministry of Productivity Promotion / National Productivity Secretariat)

We provide a wide-range of curative and preventative healthcare expertise for inpatients, outpatients, and outreach patients including emergency, surgical, medical and modern diagnostic facilities. Overview of our clinical and auxiliary services are summarized as follows

Department of **GENERAL SURGERY**

Dr.D.A.K.N.Dunusinghe, Consultant General Surgeon
Dr. S.A.Gunawardhena, Consultant General Surgeon

The department functions as two units with five wards headed by two General surgeons and patients are managed through 256 bedded wards with 12 acute beds. Casualty surgical patients are admitted to casualty surgical wards and transferred to surgical /post-surgical wards for further management.

The General Surgery Department offers a comprehensive and high quality range of surgical procedures to the local community. A wide range of surgical procedures are undertaken as day and inpatient cases in addition to minor operations. From a relatively simple hernia operation to a more complex procedure, our surgeons are all guided by their dedication to providing the best possible outcome for their patients.

The health and safety of every mother and child is our highest priority. Outstanding results, an excellent safety record and caring personal service have led to it becoming the first choice for women looking to create their special birth experience knowing they are fully informed, safe and in control.

The Gynecology department provides a full range of emergency and elective gynecology services and offers general gynecology and reproductive medicine including investigations, advice and management of infertility problems.

Department of OBSTETRICS & GYNECOLOGY

Dr. Kapila Vithanachchi , Consultant VOG

Dr. Hilmy Salih, Consultant VOG

The Department of Obstetrics and Gynecology consisting of two units is a leading centre in all aspects of women's health, with recognized programs in obstetrics and gynecology. Each unit comprises of antenatal, post-natal ward and a labour room. Gynecology wards of both units have been shifted to a new location.

Dedicated operating theatre with two operating tables is available for this department with the aim of offering prompt operative care.

As the requirements continued to grow in volume and complexity during past years, the unit went through a number of upgrades during last few years to meet the expanding requirements. These upgrades, including eye clinic being moved to new spacious building, and contribution of dedicated, experienced team of consultant, medical officers and the supportive staff of the unit have ensured the maximum patient care to the community.

Department of OPHTHALMOLOGY

Dr. R.W.W.M.R.P.B.Iddawala, Consultant Eye Surgeon

The Department of Ophthalmology provides inpatient and outpatient eye care services for the hospital's catchment area in Uva province.

Dedicated operating theatre is available for this department with an aim of offering prompt operative care.

In year 2012, 41423 patients were seen at the eye clinic and it was an increase of 47% compared to 2009 and this has been made possible by conducting clinics from Monday to Saturday [6 days a week] and through the dedication of medical staff with the enthusiastic guidance of the consultant

Radiotherapy unit

Radiotherapy unit offers services as a part of the multidisciplinary approach for comprehensive management of cancer with an objective of cure or with intent to give relief of some distressing symptoms .The unit, headed by consultant oncologist, offers optimal radiotherapy using available facilities

Department of **CARDIOLOGY**

Dr. H.M.C.P. Hathlahawaththa, Consultant Cardiologist

The Cardiology Department provides a diagnostic and treatment service for patients referred with heart diseases. The service comprises outpatient facilities, inpatient provision, a comprehensive range of non-invasive investigational facilities [e.g. 2D ECHO, Halter monitoring / exercise ECG], invasive procedures [e.g. pericardial aspiration] and range of interventional cardiology procedures [e.g. insertion of TPM]

The Department caters for patients from Uva and adjacent provinces and has a 5 bed ICU, a 4 bed Intermediate facility and a 20 bed ward.

Cardiology department conducts four different types of clinics including cardiac rehabilitation clinic (especially for patients with myocardial infarction) and heart failure clinic.

The unit offers a wide range of expertise in prevention, screening, diagnosis and treatment for patients with heart disease and patients have access to a full range of diagnostic tests to accurately diagnose and evaluate conditions. Patients receive the highest standard of specialized care, treatment and monitoring in our Intensive and Intermediate Care divisions

EMERGENCY TREATMENT UNIT

Dr. Pradeep Rohanage– Medical officer In-charge

We deliver emergency and acute care around -the-clock for patients experiencing serious acute illness or traumatic injuries. Our emergency treatment unit offers assessment and initial treatment to critically ill patients, including treatment of cardiac problems as well as respiratory problems, overdoses /poisoning, bites and stings.

The contribution of the ETU in minimizing inward admissions is admirable and this has been successfully achieved mainly through RTU & by performing Minor surgical procedures .

- * Involve in infection control activities in the hospital (hand washing)
- * Health education programs for health staff
- * Mediate Dengue prevention activities in the hospital
- * Staff vaccination
- * Needle prick injury reporting

Staff

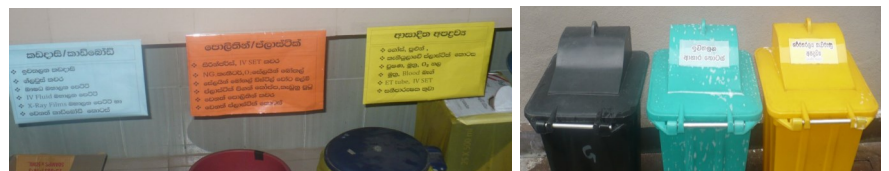

Nurses : 02

Health Assistants : 01

Waste Disposal

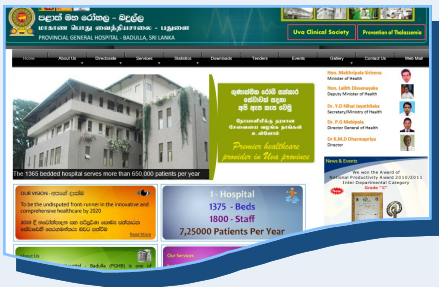

In recent years, the management of hospital waste poses to be a major problem with the appearance of disposable needles, syringes, and other similar items, but we have been able to overcome the problem, despite high volumes of waste generated by large number of patients and visitors using the hospital facilities, by implementation of the standard guidelines.

Sanitary Services

Hospital contracts with an outside service private company for housekeeping services and this offers services to maintain a clean, safe, sanitary, and healthful environment in the hospital.

- * supervisors :07
- * total number of workers :154 (day-135, night 19)

Data management & Health Information unit (Telemedicine unit)

The unit is supposed to be involved in hospital statistical data handling and in maintaining human resource management database.

In addition to its primary functions ,

- * maintains and updates the hospital website on regular basis.
- * Free internet facility –helps to take advantage of new technology ; to prepare for the replacement of the legacy patient management ;to address the educational needs of health workers.

New initiatives and enduring projects came to fruition during the year 2012. Some of these are summarized below.

Completed Projects

Projects above 2 Million

Supply and installation new machine to increase the capacity of Medical Gas System) - 3.4 million

Repair and Renovation of Sewerage system - 3.2 million

Projects : 0.5 to 2 Million

Renovation of Director Quarters - 1.9million

Construction of rear Gate with access and repairing of drainage System - 1.9 million

Construction of roof (balcony Mental Health Unit 1st floor) - 1.9 million

Extension of Oxygen supply to new OPD - 1.5 million

Construction of corridor (new Drugs stores) - 1.4 million

Repair of Wiring and Switch boards (All corridors) - 1.3 million

Projects : 0.1 to 0.5 Million

Supply and installation of 3 Air Conditioner (12000 Btu) in the Hematology Laboratory

Construction of waiting area for Diabetic Patients

Conversion of library room to EEG room (new OPD complex)

Renovation of Accountants office

Renovation of NTS kitchen

Supply and installation of hand washing basin and wall racks (MICU)

Construction of toilet to on-call room (Neuro-Surgery)

Construction of 2 water tanks at Mental Health Unit

Repair ward 25 (Toilet and drainage system)

Supplying and Installation of an Air Conditioners at Blood Bank

Supplying, Fabricating and Fixing of Aluminum partition and steel door at Drugs Stores ground, first and second floor main entrance area

Supply and installation Grills for windows (Drugs stores)

Repair of toilet (ward 28,29)

Supplying and Installation of an Air Conditioners at the Director's Office

Supplying and Installation of an Air Conditioners at the Eye Theatre

Installation of 18000 Btu/hr. air conditioner unit at the Ophthalmic Unit

Under mentioned services /facilities were started during the year 2012 and acquire equipment to enforce our health care

Improvements (Services / facilities)

- ◇ **Functioning of New Ward and Clinic Complex with the relocation of following units**
 - Mental Health wards
 - OMF wards
 - Dental OPD
 - Orthodontic Unit
 - Clinic Services - Medical / Pediatric / Neurology / Dermatology / Mental Health
- ◇ **New outreach Services - following outreach clinics were started**
 - Eye clinics
 - Neurosurgical clinics
- ◇ Relocation of Pediatric ward 23 and Thalassemia ward to new building (Drug Stores Building)
- ◇ Installation of way finding and name boards

Equipment

We acquired following equipment to our hospital to strengthen our capacity

Equipment	Quantity
Yag laser system	1
Endoscopy Unit(9.2 million)	1
EMG Machine	1
Multipara Monitors	10
Pulse Oximeters	10
ECT Machine	1
CPAP System	1
Electro Surgical unit	2
CTG Machine	3
Muscle Stimulator	1
Phototherapy unit	2
Patient warmers	2
Fluid warmers	4
Respirometer	1
Syringe pump	8
Dialysis unit	1
Urology instruments (3 million)	1
Orthopedic pneumatic drill (4.6 M)	1

Leading causes-Hospitalization/deaths

Year 2012

Annual report
Pgh Badulla

A) LEADING CAUSES OF HOSPITALIZATION - Year 2012

	Number	Percentage
Persons encountering health services for examination/investigation/specific procedures	9258	10%
Single spontaneous delivery	4917	5%
